WEATHER OF CONCERN

Weather of Concern

- A Pacific frontal system is forecast to move into Northern California Thursday night. Light higher elevation snow Thursday night will be followed by heavier snowfall on Friday as the front moves across the state.
- A cold storm system will approach the Southern California coast Thursday night into Friday, bringing rain and mountain snow to Southwest California late Friday and Saturday.

Active Weather Warnings, Watches and Advisories by County:

http://www.wrh.noaa.gov/sto/brief/wwa_bc_cal.php

WEATHER SYNOPSIS BY REGION

NORTHERN CALIFORNIA

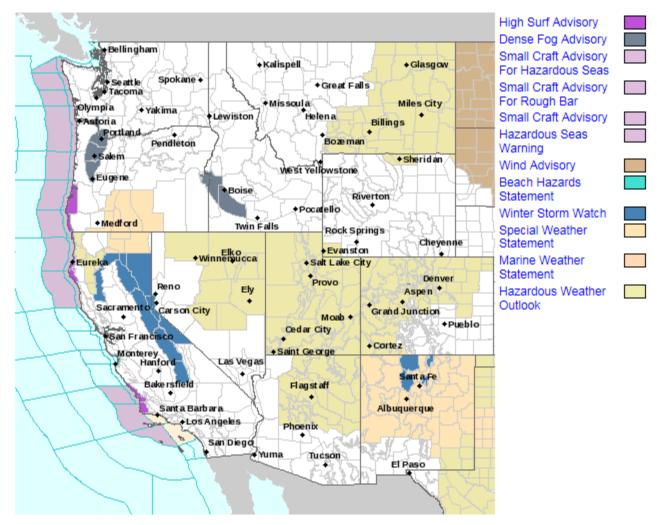

Winter is now upon us as of 0244 PST this morning. The last of the most recent weather systems was still affecting the far southeast portion of the region this morning with some showers, but all that will be ending by midday. For the most part conditions will be dry today into Thursday as higher pressure moves over the region. Some areas of gusty north to northeast winds will persist into this evening before decreasing. Thursday night and Friday a major weather system will move into the region with rain and snow, locally heavy at times and with significant amounts of high country snow expected. There will also be some gusty southerly winds develop with that system, so uprooting of trees will be possible. Local water courses will run a little high again as well. Snow levels will stay above most pass levels at first, but lower Friday night to around 2000 feet in the northwest to around 4500 feet in the southern areas. However, most of the precipitation will be showery by the time the snow levels drop that low, so not much accumulation is expected there when that happens. Holiday mountain travel is likely to become difficult Friday into Saturday morning. Christmas Eve and Day look to be mostly dry and milder under a passing high pressure ridge.

SOUTHERN CALIFORNIA

An area of low pressure off the coast will bring showers to Southern California through Friday morning. Most foothill and mountain locations will receive between 1 and 2 inches of rainfall, while most coastal and valley locations will get between a quarter inch and an inch of rainfall. No rainfall is expected across Central California with this low pressure area. Temperatures will be above normal through Thursday, especially across Central California. Maximum temperatures will be mainly in the 50s to low 60s across Central California and the mountains of Southern California and 60s to low 70s across the rest of Southern California. A Pacific storm will bring a period of rain to Central California starting Friday afternoon and to Southern California starting Friday night. Showers will continue across the region through Saturday evening. Most foothill and mountain locations will receive 2 to 4 inches of rainfall and most coastal and valley locations will receive between 1 and 2 inches of rainfall with this storm. The snow level will drop to around 3,000 feet by Saturday morning. Southerly winds of 20 to 40 mph with gusts to 60 mph across the mountain ridges and desert passes Friday afternoon and Friday night. There will be westerly winds of 20 to 40 mph with gusts to 60 mph across the mountain and desert areas Saturday. A weak ridge of high pressure will bring warming and drying Sunday.

WEATHER MAP

CAL OES LAW ENFORCEMENT MISSIONS

Cal OES Law Missions

• 12/21/16 at 0100 hrs: Riverside County Sheriff requested a search helicopter to assist in locating 2 hikers missing in the area of 33.532331°N by 117.393016°W, which plots to the Fisherman Camp Trail, Cleveland National Park, Riverside County. While contacting potential resources, the hikers were located and the request cancelled. **Mission Closed.**
